Subject: New TF/FC Tire for 2016

After a long and successful service life, the time has come to retire the D2681. A new TF/FC tire, the D2747 has been developed and will be the new tire for use for the 2016 season. For the first six races of the year, the Pomona Winternationals through the Houston Springnationals, both D2681 and D2747 may be used in competition. This will give you ample time to manage inventories. From our testing beginning in 2014, equal on-track performance of the two tires will allow them both to be used without an unfair advantage.

We are beginning production on the D2747 in November but it will not be available at the Pomona World Finals. It would be best to coordinate with the Goodyear distributor either at Las Vegas or Pomona to discuss your testing needs over the off season.

Goodyear appreciates the opportunity to serve the fastest sport in the world and we pride ourselves in providing a product to meet your needs. Please keep lines of communication open if you have any questions or concerns.

Best regards,

Bryce Jones
