NHRA TECHNICAL BULLETIN

During a recent NHRA ET Finals event an electric Jr dragster had a lithium battery catch on fire while on the charger. As a reminder to anyone charging Lithium batteries please be advised of the following:

- Please verify that all cells in your battery packs are balanced prior to charging. If you are unfamiliar with battery cell balancing, please contact your battery manufacturer for information prior to charging.
- DO NOT charge batteries in an enclosed area/trailer.
- DO NOT leave batteries that are on a charger unattended.
